**AMENDMENTS TO THE CLAIMS** 

No claims are amended in this response. Claims 1-28 are pending in the application.

Claims 1-28 were originally filed on September 22, 2003, and were rejected in an Office action

mailed July 28, 2005. Claims 1, 12, and 23 are independent claims. Claims 2-11, 13-22, and 24-

28 depend from independent claim 1, 12, and 23, respectively.

**Listing of Claims:** 

Claim 1. (Original) A system providing billing support for the exchange of media, the

system comprising:

a first television display in a first home of a first user;

a first storage in the first home, the first storage supporting media consumption by the

first television display in the first home, and having a first network protocol address;

a user interface, at the first home, having at least one user defined media channel, each of

the at least one user defined media channel comprising a sequence of user selected and scheduled

media, the user interface supporting selection and scheduling of the media;

at least one server storing the media, and having a second network protocol address; and

server software that receives from the first home via a communication network a request

for the delivery of media, the request comprising information securing payment for delivery, and

that responds by coordinating the delivery of the media from the at least one server at the second

network protocol address to the first storage at the first network protocol address for

consumption by the first television display.

Claim 2. (Original) The system of claim 1 wherein the media comprises at least one of

audio, a still image, video, and data.

Response dated October 13, 2005

Reply to Office Action of July 28, 2005

Claim 3. (Original) The system of claim 1 wherein the first and second network protocol

addresses are one of an Internet protocol (IP) address, a media access control (MAC) address,

and an electronic serial number (ESN).

Claim 4. (Original) The system of claim 1 wherein the communication network

comprises at least one of a cable infrastructure, a satellite network infrastructure, a digital

subscriber line (DSL) infrastructure, an Internet infrastructure, an intranet infrastructure, a wired

infrastructure, and a wireless infrastructure.

Claim 5. (Original) The system of claim 4 wherein the communication network is the

Internet.

Claim 6. (Original) The system of claim 1 wherein consumption comprises at least one

of playing digitized audio, displaying a still image, displaying video, and displaying data.

Claim 7. (Original) The system of claim 1 wherein the information securing payment for

delivery comprises at least one of a device ID, a public key for encryption, information related to

services, information regarding payment terms, information regarding billing, and media

push/access restrictions and limitations.

Claim 8. (Original) The system of claim 1 wherein the information securing payment for

delivery is received via the communication network from a second user at a second home.

Claim 9. (Original) The system of claim 1 further comprising:

at least one media peripheral communicatively coupled to the first storage;

the at least one media peripheral providing at least a portion of the information securing

payment for delivery; and

the media being delivered to the at least one media peripheral.

Claim 10. (Original) The system of claim 9 wherein the at least one media peripheral

comprises at least one of a digital camera, a digital camcorder, a television, a personal computer,

a CD player, a home juke-box, a multi-media gateway device, a multi-media personal digital

assistant, a DVD player, a tape player, and a MP3 player.

Claim 11. (Original) The system of claim 1 wherein the identity of a user receiving

media is unknown to the at least one server.

Claim 12. (Original) A system providing billing support for the exchange of media, the

system comprising:

a first storage in the first home, the first storage supporting media consumption, and

having an associated first protocol address;

a second television display in a second home, and having an associated second protocol

address;

a user interface, at the first home, having at least one user defined media channel, each of

the at least one user defined media channel comprising a sequence of user selected and scheduled

media, the user interface supporting selection and scheduling of the media;

at least one server storing the media; and

server software that receives from the first home at the associated first protocol address,

via a communication network, a request for the delivery of the media, the request comprising

information securing payment for delivery, and that responds by coordinating the delivery of the

media from one of the first storage and the at least one server to the second television display at

the associated second protocol address for consumption.

Claim 13. (Original) The system of claim 12 wherein the media comprises at least one

of audio, a still image, video, and data.

Claim 14. (Original) The system of claim 12 wherein the first and second protocol

addresses are one of an Internet protocol (IP) address, a media access control (MAC) address,

and an electronic serial number (ESN).

Response dated October 13, 2005

Reply to Office Action of July 28, 2005

Claim 15. (Original) The system of claim 12 wherein the communication network

comprises at least one of a cable infrastructure, a satellite network infrastructure, a digital

subscriber line (DSL) infrastructure, an Internet infrastructure, an intranet infrastructure, a wired

infrastructure, and a wireless infrastructure.

Claim 16. (Original) The system of claim 15 wherein the communication network is the

Internet.

Claim 17. (Original) The system of claim 12 wherein the at least one server comprises at

least one of a 3rd party service provider, a media storage server, and a broadband head end.

Claim 18. (Original) The system of claim 12 wherein the identity of a user receiving

media is unknown to the at least one server.

Claim 19. (Original) The system of claim 12 wherein the information securing payment

for delivery comprises at least one of a device ID, a public key for encryption, information

related to services, information regarding payment terms, information regarding billing, and

media push/access restrictions and limitations.

Claim 20. (Original) The system of claim 12 further comprising:

at least one media peripheral communicatively coupled to the set top box circuitry; and

the at least one media peripheral providing the media.

Claim 21. (Original) The system of claim 20 wherein the at least one media peripheral

comprises at least one of a digital camera, a digital camcorder, a television, a personal computer,

a CD player, a home juke-box, a multi-media gateway device, a multi-media personal digital

assistant, a DVD player, a tape player, and a MP3 player.

Claim 22. (Original) The system of claim 12 wherein at least one of billing and payment

is secured before delivery of the media occurs.

Claim 23. (Original) A system providing billing support for the exchange of media, the

system comprising:

Response dated October 13, 2005

Reply to Office Action of July 28, 2005

a first storage in the first home;

a second television display in a second home;

a user interface having at least one user defined media channel comprising a sequence of

user selected and scheduled media, the user interface supporting selection and scheduling of the

media;

at least one server storing the media; and

server software that receives a request for the delivery of the media, the request

comprising information securing payment for delivery, and that responds by coordinating the

delivery of the media from one of the first storage and the at least one server to the second

television display for consumption.

Claim 24. (Original) The system of claim 23 wherein the media comprises at least one

of audio, a still image, video, and data.

Claim 25. (Original) The system of claim 23 wherein the communication network

comprises at least one of a cable infrastructure, a satellite network infrastructure, a digital

subscriber line (DSL) infrastructure, an Internet infrastructure, an intranet infrastructure, a wired

infrastructure, and a wireless infrastructure.

Claim 26. (Original) The system of claim 23 wherein the identity of a user receiving

media is unknown to the at least one server.

Claim 27. (Original) The system of claim 23 further comprising:

at least one media peripheral communicatively coupled to the first storage; and

the at least one media peripheral acting as one of a source or a destination for the media.

Claim 28. (Original) The system of claim 27 wherein the at least one media peripheral

comprises at least one of a digital camera, a digital camcorder, a television, a personal computer,

Response dated October 13, 2005 Reply to Office Action of July 28, 2005

a CD player, a home juke-box, a multi-media gateway device, a multi-media personal digital assistant, a DVD player, a tape player, and a MP3 player.
